R FW

Studied fine art in Nottingham, 1977-80. Participated in many artists-in-schools residency and exhibitions in the early 80's and 90's before forming an arts fabrication company in 1996. Created numerous public art sculpture up until 2020 when the business was sold for me to concentrate on creating my own studio work.

Work is generated in various formats based predominantly on everyday situations. A collection of artifacts, drawings and collages can be developed into or through digital means to create printing blocks, relief sculptures or metal castings.
