**PW** (Disabled access via a lift but call artist in advance - call to come and help with lift)

Kit is the woman behind Foto Ceramica and started making her contemporary ceramics in 2006. As both a seasoned Ceramicist and Photographer, she developed her decorative Gum Bichromate photographic process, which allows her to expose her photographic images directly onto the ceramic surface, giving her work its distinctive look. A fellow member of Design Nation, she regularly exhibits at Ceramic and Mixed craft fairs (Lustre, Craft Festival@ Bovey Tracey, Ceramics in Southwell). She is showing her work at Nottingham Ceramic School, which she founded in 2020. Benn Dodd (Throwing tutor) and Perry Henley (technician) who both work at the school are invited guest makers.
