C NW (I am in central Sherwood with Cafes all around. Sadly, there are stairs as I am in an upstairs studio and no disabled access)

I have always made 'stuff', I studied printmaking, design, bookmaking and fine art at different times in my life, It's the making that I enjoy, the hands-on effort of creating something. I make books because I like the process, from choosing the cover material to laying out the pages. I love Printmaking and painting as they are so expressive, the layers and the colours are my passion. The collages that I make are created in the same way, layers of colour.

I have made artists books in many unusual formats and many shapes and sizes for events or exhibitions. I will be displaying them at my studio for Open Studios as a collection.

My studio is rented and is above The Crimson Tree Cafe in Sherwood, there are three studios that are part of Sherwood Studios in the same building.
